

J45R

Recirculating Jaw Crusher

The McCloskey™ J45R recirculating Jaw Crusher combines the productivity of our J45 with the versatility of a full screening and recirculating system, allowing operators to produce a crushed and screened final product with one machine.

The combination of the Jaw Crusher along with the 5'x10' High Energy Screenbox and a recirculating conveyor deliver maximum productivity. The radial

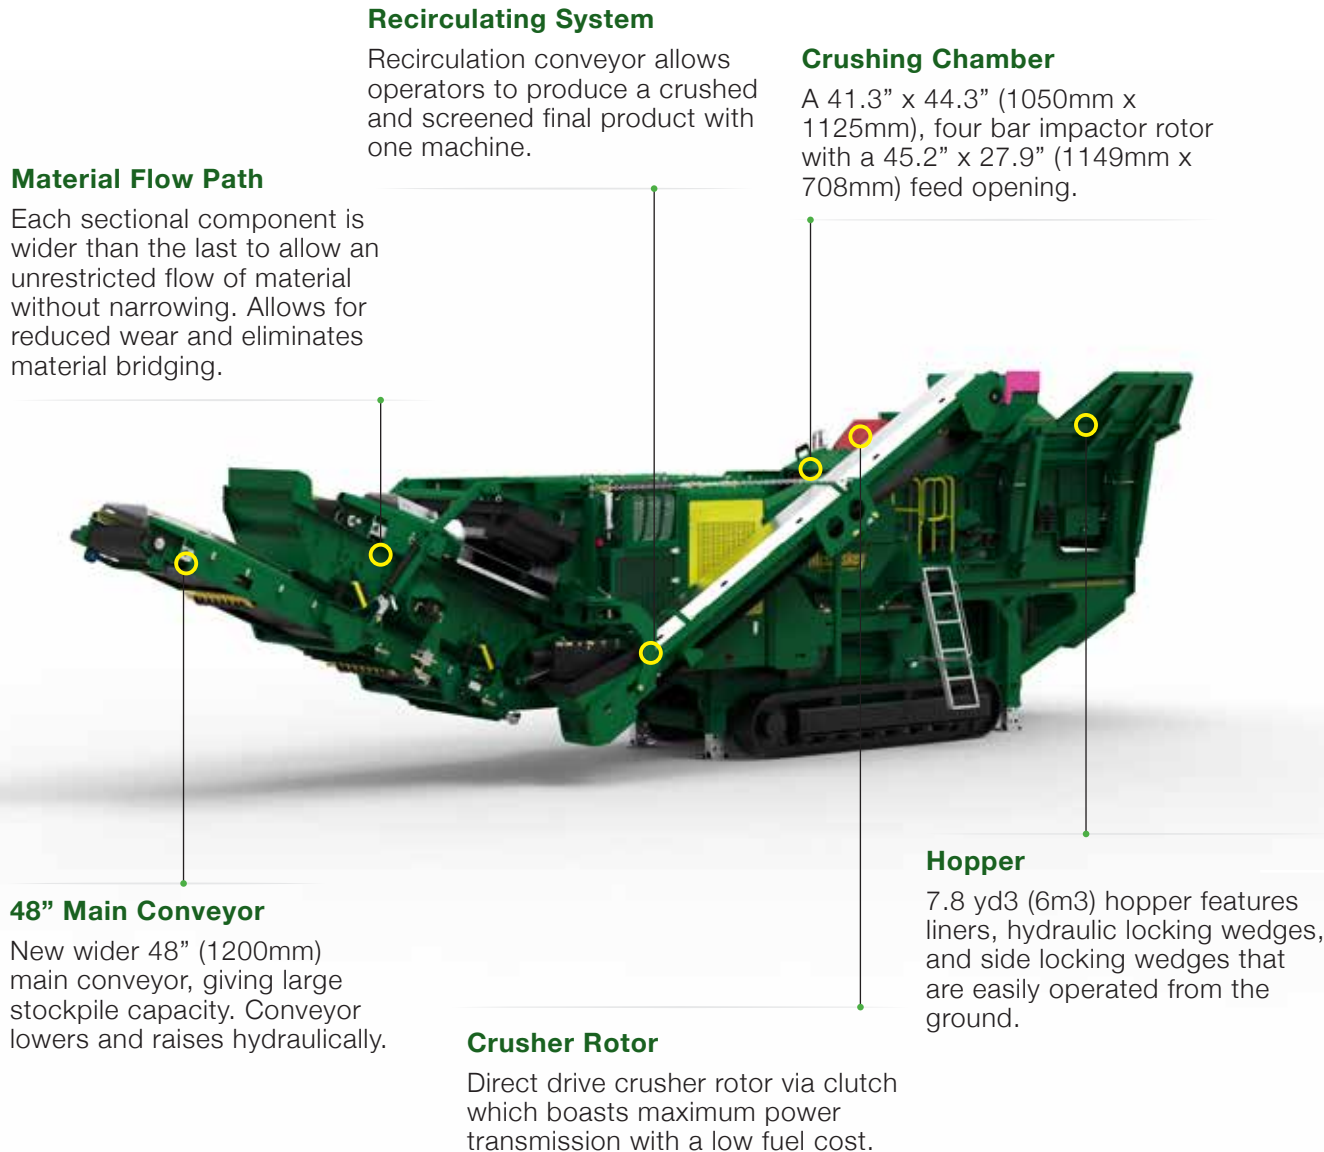

recirculating conveyor allows operators to either return material through the crusher jaws or to stockpile a separate finished product.

The J45 boasts a high capacity hopper with close to 8 cubic yards (6 m³) capacity mounted over a vibrating feeder with optional pre-screen.

Features

- 1140 (45") x 688 (27") single toggle jaw
- Track or Track c/w Wheel bogie
- Integrated hydraulic folding hopper
- Integrated hydraulic folding stockpiling conveyors
- I-beam plate fabricated chassis construction
- Large gap between crusher discharge and main conveyor feedboot
- Open chassis design for ease of maintenance
- Fast setup time

Dimensions and Capacities

Engine	360 Hp (268 kW) Volvo D11 T4 or T3
Transport Length	11' 1.8" (3.40m)
Transport Width	51' 4.9" (15.668m)
Transport Height	9' 1.5" (2.78m)
Weight - w/ magnet & dirt conveyor	92,594 lb (42,000kg)
Impact Rotor	41.3" diameter x 44.3" wide
Stockpile Height Fines Conveyor	13' 7.1" (4.142m)
Stockpile Height Side Conveyor	8' 2" (2.48m)
